Blackboard 9.1 – How to Add A Course Resources Menu Button

The addition of a Course Resources content area to a course provides instructors with a central location to share additional course resources with students. Resources found in a Course Resources area could be (but not limited to) links to Internet related content, helpful documents, photos, or helpful videos.

1. Enter the course where a Course Resources menu button is needed.

2. Make sure Edit Mode is ON.

3. Click on the Add Menu Item button.

4. Select Create Content Area

5. Type in Course Resources in the Name text entry box.

6. To make the content available check the Available to Users box. Note to make the content unavailable leave the Available to Users box unchecked.

7. Click the Submit button.
